

ELECTRIC HYDRAULIC PUNCHER

HYDRAULIC PUNCHER CHARACTERISTIC

● Handhold Hydraulic Puncher

Long use life
Forging technology makes work-head stable
Lighter weight
Aviation aluminum pump body
Low failure rate
Electric motor has insulation structure

● Brushless Hydraulic Puncher

High speed
Strong output
Larger pump
Forging technology makes work-head stable

Brushless electric motor
Low noise
Long use life

● Electric Handhold Hydraulic Puncher

Li-ion battery has strong electric power storage
Safety switch design
Can be applied to any place without external power.

▼ Handhold Hydraulic Puncher

Portable electric hydraulic puncher is used for punching steel, iron, copper, aluminum, formed steel, U-steel, I-steel and so on. Small size, light weight, easy to operate, save effort and punch fast, the mould can be customized.

The second generation of portable punching machine uses brushless motor technology and space aluminum material. It has lighter weight, less noise, faster speed and longer life.
